
Senior Front End Developer

Job Description

Title: Senior Front End Developer

Type: Full Time

Location: Remote

Skills: React, Node.js, Typescript, JavaScript, HTML, CSS, Interfacing with GraphQL and REST Services

About HLN Consulting, LLC

With roots in academia, HLN Consulting is a leading health information technology consulting company. Our mission is to enhance and support the capabilities of public health organizations and healthcare providers by providing high quality consulting services, strategic planning, software development (including open source solutions), and software hosted as a service. For more than two decades, our work products have led to improvements in the health and well-being of patients and populations. We are a fully virtual company seeking out and employing highly talented staff from around the country, all of whom work remotely.

Job Description

HLN is seeking an expert Front End Developer. In this position, the developer will collaborate with HLN's other software engineers and business analysts to support custom enterprise systems for our clients, who include public health agencies and their partners. The developer will participate in the design and development of new applications and services, implement enhancements to existing systems, and maintain and support the production environments for HLN's clients. The developer will also participate in the effort to migrate legacy applications to modern frameworks. The work will be performed within a fast paced, highly collaborative environment and will have a significant positive impact on public health.

Qualifications

The ideal candidate for this position will have the following qualifications:

Technical Skills and Experience

- Core skills and experience
 - Professional Software Engineering Experience: 5+ years
 - React: 3+ years
 - Node.js: 3+ years
 - Typescript: 1+ years
 - JavaScript, HTML, CSS: 3+ years
 - Component-based development
 - CSS-in-JS (e.g. Styled Components)
 - Experience interfacing with GraphQL and REST APIs
 - Designing and Developing Web Applications
 - Unit Testing, Integration Testing, E2E Testing, and UI Performance Testing
 - Troubleshooting, diagnosing, and fixing bugs in complicated enterprise systems
 - Working in Linux programming environments
 - Utilizing Git and GitOps
- Familiarity with the following:
 - Module federation
 - Global state management in React (experience with Apollo or react-query is a plus)
 - Build tooling (e.g. WebPack)
 - UI design tools (e.g. AdobeXD, Storybook, Figma)
 - Microservice architectures
- Familiarity with any of the following is a plus:
 - Spring Boot
 - Java front end technologies (e.g. JSP, JSF)

Setting / Environment Experience:

- Experience with Agile methodologies and tools
- Consulting experience performing custom software development for a client
- Consulting experience providing maintenance and support of a client's enterprise system
- Comfortable working in a *dynamic* environment where the client's needs are rapidly changing, and their own activities and work products are highly important and time-sensitive
- Works well remotely

Other Qualifications:

- Highly motivated self-starter
- Has a "I am a Problem Solver" mindset, and a "Roll up the sleeves and pitch in where needed" mindset
- Collaborates well with other software engineers, and with business analysts, product owners, and non-technical stakeholders
- Works well independently
- Shares HLN's Core Values, which are:
 - Service to our Clients
 - Collaboration
 - Intellectual Rigor
 - Social Consciousness
 - Trust and Respect
