
Senior Java Spring Boot Developer

Job Description

Title: Senior Java Spring Boot Developer

Type: Full Time

Location: Remote

Skills: Java, Microservices using Spring Boot, Git & GitOps, cloud development experience (e.g. Azure, Google Cloud Platform, AWS)

About HLN Consulting, LLC

With roots in academia, HLN Consulting is a leading health information technology consulting company. Our mission is to enhance and support the capabilities of public health organizations and healthcare providers by providing high quality consulting services, strategic planning, software development (including open source solutions), and software hosted as a service. For more than two decades, our work products have led to improvements in the health and well-being of patients and populations. We are a fully virtual company seeking out and employing highly talented staff from around the country, all of whom work remotely.

Job Description

HLN is seeking an expert Java Developer with experience developing microservices using Spring Boot. In this position, the developer will collaborate with HLN's other software engineers and business analysts to support custom enterprise systems for our clients, who include public health agencies and their partners. The developer will participate in the design and development of new applications and services, implement enhancements to existing systems, and maintain and support the production environments for HLN's clients. The developer will also participate in the effort to migrate legacy applications and services from a monolith architecture to a microservice architecture. The work will be performed within a fast paced, highly collaborative environment and will have a significant positive impact on public health.

Qualifications

The ideal candidate for this position will have the following qualifications:

Core Experience

- Expert Java development - 7+ years
- Designing and developing Microservices using Spring Boot - 3+ years
- Strong experience with both SQL databases and NoSQL databases
- Troubleshooting, diagnosing and fixing bugs in complicated enterprise systems
- Working in Linux environments
- Utilizing Git and GitOps
- Load Testing and Performance Testing
- Demonstrated ability to quickly learn and apply new skills and technologies
- Experience with any of the following:
 - Major cloud platforms such as Azure, Google Cloud Platform, or AWS
 - Kubernetes
 - Containerization technologies

Setting / Environment Experience:

- Very comfortable with Agile methodologies and tools
- Consulting experience performing custom software development for a client
- Consulting experience providing maintenance and support of a client's enterprise system
- Comfortable working in a *dynamic* environment where the client's needs are rapidly changing, and their own activities and work products are highly important and time-sensitive
- Works well remotely

Other Qualifications and Skills:

- Highly motivated self-starter
- Has a "I am a Problem Solver" mindset, and a "Roll up the sleeves and pitch in where needed" mindset
- Collaborates well with other software engineers, and with business analysts, product owners, and non-technical stakeholders
- Works well independently
- Shares HLN's Core Values, which are:
 - Service to our Clients
 - Collaboration
 - Intellectual Rigor
 - Social Consciousness
 - Trust and Respect
