General Public Health Training Resources

These resources, provided by public health organizations, serve as a comprehensive repository for online training on various public health topics. Additionally, they highlight training opportunities from different public health associations, catering to the interests of public health professionals.

Organization	Resource	Description
Association of Schools of Public Health (ASPH)	Academic Program Finder	Searchable resources to identify programs based on academic program areas such as by searching “informatics,” which results in a listing of certificate programs and advanced degree programs across all schools of public health.
CDC	CDC TRAIN	This resource is a refresher on all essential public health practice and contains a variety of online courses and videos organized based on different topics.
CSTE	CSTE Learn	This resource offers CSTE’s courses and resources for the professional development and training needs of applied epidemiologists.
NACCHO	Public Health Infrastructure and Systems	Provides tools and resources across various categories, including human, organizational, informational, legal, policy, and fiscal resources.
PHII	Public Health Courses Immunization Information System Courses	This resource offers both introductory and advanced courses in Public Health Informatics and other core topics of Public Health.
Public Health Data Learning Center	Public Health Basics	This resource provides training focused on fundamental concepts in core functions and essential services of public health, public health informatics and public health surveillance.

Fellowship and Other Training Opportunities

The resources listed are fellowship programs offered by public health organizations that focus on specific topics within public health. Additionally, these fellowship programs emphasize mentorship, networking, tackling community health challenges, and connecting fellows with experts in the field.

Organization	Program
AmeriCorps	Public Health Informatics Training Program
CDC	Public Health Informatics Fellowship Program (PHIFP)
CDC	Steven M. Teutsch Prevention Effectiveness Fellowship (PE)
CSTE	The Applied Epidemiology Fellowship
CSTE	Applied Public Health Informatics Fellowship
